Delivering Accuracy, Building Trust.

Key Strengths

Decades of Expertise
Our company has been established over 40 years of experience in providing the highest quality insulation and packaging solutions to our clients.

State-of-the-art Manufacturing
Our state-of-the-art manufacturing facilities are equipped with the latest technology to ensure the highest quality of our products.

Significant Skill and Training
Our team of experts is highly trained and experienced in providing the highest quality of our products.

Comprehensive Product Range
We offer a wide range of products to meet the needs of our clients.

High Quality Standards
We adhere to the highest quality standards to ensure the highest quality of our products.

Customer Packaging
We provide a wide range of packaging solutions to meet the needs of our clients.

CEO's Message

"Welcome to Thermopor Packages. We are a company that has been established over 40 years of experience in providing the highest quality insulation and packaging solutions to our clients. We are a company that has been established over 40 years of experience in providing the highest quality insulation and packaging solutions to our clients. We are a company that has been established over 40 years of experience in providing the highest quality insulation and packaging solutions to our clients."

Muhammad Shahzad
Chief Executive Officer

PRODUCTS

EPS Sheets

EPS sheets are a type of rigid foam insulation made from expanded polystyrene (EPS) beads. They are used for a wide range of applications, including wall insulation, roof insulation, and floor insulation.

Availability:

- Available in various thicknesses and sizes.
- Available in various colors.
- Available in various grades.
- Available in various quantities.

Thermo-Pack

Thermo-Pack is a type of rigid foam insulation made from expanded polystyrene (EPS) beads. It is used for a wide range of applications, including wall insulation, roof insulation, and floor insulation.

Availability:

- Available in various thicknesses and sizes.
- Available in various colors.
- Available in various grades.
- Available in various quantities.

Thermopack⁺

EPS Packaging

Thermopack⁺ is a type of rigid foam insulation made from expanded polystyrene (EPS) beads. It is used for a wide range of applications, including wall insulation, roof insulation, and floor insulation.

Availability:

- Available in various thicknesses and sizes.
- Available in various colors.
- Available in various grades.
- Available in various quantities.

Thermopack⁺

EPS Packaging

Thermopack⁺ is a type of rigid foam insulation made from expanded polystyrene (EPS) beads. It is used for a wide range of applications, including wall insulation, roof insulation, and floor insulation.

Availability:

- Available in various thicknesses and sizes.
- Available in various colors.
- Available in various grades.
- Available in various quantities.

About Us

Our company has been established over 40 years of experience in providing the highest quality insulation and packaging solutions to our clients. We are a company that has been established over 40 years of experience in providing the highest quality insulation and packaging solutions to our clients.

Our Vision

To be a leading provider of high-quality insulation and packaging solutions to our clients.

Our Mission

To provide the highest quality insulation and packaging solutions to our clients.

Core Values

- Integrity
- Quality
- Customer Service
- Innovation
- Sustainability

Our Services

Our company provides a wide range of services to our clients, including insulation, packaging, and testing services.

Testing

Our testing services include thermal conductivity testing, density testing, and compressive strength testing.

Lab Development & Accreditation

Our lab development and accreditation services include ISO 9001 certification and ISO 17025 certification.

Efficient Treatment Plant Services

Our efficient treatment plant services include design, construction, and operation of treatment plants.

Construction

Our construction services include design, construction, and operation of buildings.

Sab Labs Testing Services

Offering the largest testing capability for

Testing & Consultancy Categories (Summary)

Our testing services include thermal conductivity testing, density testing, and compressive strength testing. We also offer consultancy services for our clients.

Thermal Conductivity Testing

Our thermal conductivity testing services include steady-state and transient testing.

Density Testing

Our density testing services include bulk density testing and apparent density testing.

Compressive Strength Testing

Our compressive strength testing services include static and dynamic testing.

Thermal Cycling

Our thermal cycling services include temperature cycling and thermal shock testing.

Moisture Testing

Our moisture testing services include moisture uptake testing and moisture loss testing.

Acoustic Testing

Our acoustic testing services include sound absorption testing and sound transmission testing.

Fire Testing

Our fire testing services include fire resistance testing and fire spread testing.

Chemical Testing

Our chemical testing services include chemical analysis and chemical stability testing.

Biological Testing

Our biological testing services include biodegradability testing and biocompatibility testing.

Electrical Testing

Our electrical testing services include electrical resistance testing and electrical insulation testing.

Mechanical Testing

Our mechanical testing services include tensile strength testing and impact testing.

Optical Testing

Our optical testing services include refractive index testing and optical density testing.

Acoustic Testing

Our acoustic testing services include sound absorption testing and sound transmission testing.

Fire Testing

Our fire testing services include fire resistance testing and fire spread testing.

Chemical Testing

Our chemical testing services include chemical analysis and chemical stability testing.

Biological Testing

Our biological testing services include biodegradability testing and biocompatibility testing.

Electrical Testing

Our electrical testing services include electrical resistance testing and electrical insulation testing.

Mechanical Testing

Our mechanical testing services include tensile strength testing and impact testing.

Optical Testing

Our optical testing services include refractive index testing and optical density testing.
